

# S. Talkovich Electric Guitars

## Tele-SOLD

As This guitar was reviewed by G.E. Smith, Stephen Talkovich's attention to detail is wonderful. Stephen Talkovich used laser engraving process on the design. Great tone. It is characteristically tele sounding and articulate. The Rockwood neck helps to create sustain and note definition. The action is fast and smooth. We are told that this guitar has been played by famous players and collectors and that this was the only model produced. Some nicks, dings, and marks in the finish. You will see some crazing in certain areas of the nitro. Everything works great and as intended. The cavity is fully shielded. This instrument is of pro quality. Call 703-335-5001 for more information.
